### Job Description

The drink team will be placed at two serving stations in the main event room. Guests will have the option of water or lemonade. There will be several premixed containers of both under your station. Refill the serving containers throughout the night. When a Buddy or Guest approaches, hand them a glass of their choice with ice. There will be Crystal Light packets and water bottles available for guests needing a sugar free option. There will also be a water station in the Prep room and Limo hallway that may need to be refilled and restocked with cups. Clean any spills around the drink stations to prevent falls.
